#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 14 September 2006.
- 2a) This action is **FINAL**.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Preston 6,196,911 in view of Breivogel et al, 5,547,417, as set forth in the Office action mailed 14 March 2006.

### ***Response to Arguments***

3. Applicant's arguments filed 14 September 2006 have been fully considered but they are not persuasive. Applicant argues that Preston cannot be combined with Breivogel et al, as they are not analogous prior art. The examiner strongly disagrees. Preston teaches an abrasive tool having plurality of abrasive grain units, each comprising a large number of abrasive grains, the abrasive grain units being arranged on the working face in a circumference direction of the working face; but does not disclose adjusters provided in recesses provided in the base metal such that bases of the adjusters are movable within the recesses, corresponding to each or some of the abrasive grain units, the adjusters serving to adjust a difference in height with respect to the dressing face between reference planes of the respective abrasive grain units, the reference planes each being defined by ends of the abrasive grains in the corresponding abrasive grain unit. Breivogel teaches adjusters provided in recesses in

the base metal such that bases of the adjusters are movable within the recesses, and the adjusters adjust a difference in height with respect to the working face of the tool between reference planes of the respective abrasive grain, the plane defined by the end of the abrasive grain. It has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, both Preston and Breivogel are in the same field of applicant's endeavor, surface material removal, and Breivogel is reasonably pertinent to the particular problem with which applicant was concerned, that of adjusting the height difference of a plurality of abrasive grain units. That Breivogel is concerned with adjusting a different type of abrasive unit than applicant is moot, Breivogel clearly teaches the advantages of being able to adjust an abrasive unit on a surface material removing tool.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
